

## CONTENTS

<b>Balogh, K., Koroknai, B. and Horváth, P.:</b> New K/Ar and Ar/Ar ages on the Veporic crystalline basement in Northern Hungary	195
<b>Bezák, V., Jacko, S., Ledru, P., Schulmann, K. and Siman, P.:</b> Structure and development of the Western Carpathian's Hercynian orogen	195
<b>Biroň, A., Kotulová, J., Magyar, J., Soták, J. and Spišiak, J.:</b> Neoalpine sub-greenschist to greenschist metamorphism of the Eastern Slovakian core complex	196
<b>Cebulak, S., Gawęda, A. and Hanak, B.:</b> Dispersed organic matter as an indicator of the metamorphic processes - the example of graphites from western tatra crystalline basement	197
<b>Faryad, S.W. and Janák, M.:</b> An overview on metamorphism of the Western Carpathians	199
<b>Gawęda, A., Pawlik, A. and Deditius A.:</b> Thermal aureole at the contact with alaskite intrusion (W. Tatra Mountains, W. Carpathians)	200
<b>Horváth, P.:</b> Petrography and metamorphic evolution of the Bódva Valley Ophiolite Complex, NE Hungary	201
<b>Iancu, V. and Berza, T.:</b> Normal versus inverted tectono-metamorphic zonation, in pre-Alpine metamorphic terranes; a case study, South Carpathians, Romania	202
<b>Ivan, P.:</b> HP/LT metamorphosed basic rocks of the Bôrka Nappe (inner Western Carpathians): their protolith, geodynamic setting and metamorphic evolution	203
<b>Jacko, S.:</b> Some consequences of the Branisko and Čierna hora structure to evolution of adjoining units of the Western Carpathians	204
<b>Koller, F. and Höck, V.:</b> Comparison of LT/HP metamorphic rock sequences from the Mesozoic units of the Eastern Alps	205
<b>Koroknai, B. and Horváth, P.:</b> New petrological data on the metamorphic evolution of the Veporic crystalline basement, Northern Hungary	207
<b>Lupták, B., Frey, M., Janák, M. and Plašienka, D.:</b> Low-grade metamorphism of mesozoic cover rocks from the veporic unit, Western Carpathians: phyllosilicates study and new illite-chlorite crystallinity data	208
<b>Németh, Z. and Putiš, M.:</b> Microfabrics, kinematics and differential stresses at the eastern contact zone of Gemericum with Veporicum (the Košice-Diana locality, Western Carpathians)	209
<b>Palinkaš, A.L., Pavlovič, G., Jurkovič, I., Hrvatovič, H.:</b> Fluids in Quartz from Central Bosnia, Indicators of Alpine Retrogressive Metamorphism	210
<b>Plašienka, D.:</b> Structure and Palealpine evolution of the Central Western Carpathians	211
<b>Sabau, G.:</b> Eclogites in metamorphic complexes: three case histories in the South Carpathians	212
<b>Sabau, G. and Iancu, V.:</b> Apparently monometamorphic rocks in a polymetamorphic pile: probable discontinuity markers	215
<b>Suk, M.:</b> The contemporaneous condition P – T in the Earth's continental crust	216
